

Planting Science Worksheet

2. Next, write clues of what the words are here. These will be used as clues for the person completing your puzzle. We've done the first one for you.

Word: Water Clue: Clear liquid that people and plants need for life

Word: Stem Clue: The main stalk of a plant

Planting Science Worksheet

4. Colour in the squares you're not using in black pencil/texta.

5. Number your words in two groups, the words going across (left to right, like usual), or top to bottom. You might want to do this on another page.

6. For your final copy, colour in all the black squares on another grid sheet, without writing the words, but including the small numbers for the across and down words. It should look something like this...
